

polypropylene 28µm

### 1. Product construction

carrier  
adhesive

### Description

polypropylene  
natural rubber

### Color

Transparent  
Transp /white /brown

### Thickness ( µm)

28  
18 +  
-----  
46

### 2. product advantages

Outstanding adhesion on cardboard boxes. Due to the combination of PP carrier and Natural Rubber adhesive this product is particularly suitable for applications in the food industry when applied in ambient conditions and subsequently frozen to -18°C.

### 3. main application

Carton boxes sealing tape, suited for semi- or automatic machines.

### 4. features

Initial adhesion/tack  
Final adhesion  
Dimensional stability

### 5. suitability on

High energy plastics: PVC, PC, ABS  
Low energy plastics: PE, PP  
Metal  
Paper/Cardboard

### 6. Technical data

Peel adhesion to SS  
Tensile Strength  
Elongation

### Testing method

Afera 5001  
Afera 5004  
Afera 5004

### Unit

N/25mm  
N/25mm  
%

### Value

> 6.5  
> 95  
> 115

### 7. storage conditions

Store in a cool dry place away from sunlight and direct heat sources.

Storage temperature : 23°C ± 2°C

Relative humidity : 50% RH ± 5%

As far as the storage conditions are respected, the product is guaranteed 12 months
