

Cutx 6040

***All-purpose cutter with an extra long blade:***

Do you need a cutter with a long, stable blade? Then the MultiCut MAX40 CUTX BASIC X6040 will inspire you! The top slide in freewheeling mode, which should be used above all for vertical cuts, has proven itself.

The MultiCut MAX40 CUTX BASIC X6040 cuts all conventional packaging. Due to its low weight, it is easy on your wrist even with frequent use and, thanks to its gently rounded shape, sits comfortably in the hand. A cord can be pulled through the screw at the end of the handle. Automatic blade retraction and easy blade change. The blade can either be operated from above or from the side. For right and left handers.

### Extra long blade and variable handling

The main difference between the MultiCut MAX40 CUTX BASIC X6040 and our MultiCut MAX CUTX BASIC X6060 is the significantly longer, stable blade. This can be operated both from the side and from above. When operating with the upper slide, you can exert significantly more pressure on the material to be cut when making vertical cuts. As with the MultiCut MAX CUTX BASIC X6060, the handle is pleasantly light in the hand and the blade is of course also suitable for all common packaging

### Sustainable

We want to do our bit: CUTX safety knives are made in Solingen / Germany from up to 80% recyclable plastic. We use sustainable energy for production and assembly, including from our own solar power system. Our extensive experience in knife production also guarantees consistently high quality and durability.

### Application Areas

CUTX safety knives assist you in your day-to-day work and protect the goods in the packaging with their short blade

foil

Cardboard

STRAPPING TAPE

adhesive tape

paper

Cutting of: Cardboard, paper, adhesive tape, strapping tape, foil For right- and left-handed people

### Easy blade change

Your two hands are sufficient as an aid. Simply set the screw horizontally at the end of the handle, slide the blade holder all the way forward, open the cover downwards and replace the blade. Complete.

### Spare parts / blades

The replacement blades are supplied in dispensers of 10 each.  
H10008 Trapezoid blade

see also safety instructions

### Safe handling

Push out the blade, put it on, release sliders. The automatic blade retraction ensures that the blade automatically slides back into the housing as soon as the cutting material is left.

### Safety instructions

Please read the instructions carefully and keep them to ensure prolonged and safe use of our cutting tools. This product is only approved for manual cutting and must not be used for purposes other than those for which it is intended. Care must be taken to ensure correct handling and use. Avoid injury: Only use cutting tools that are in good condition and have sharp, undamaged blades. Exercise caution when handling this product. Be sure to familiarise yourself with its handling and operation beforehand. The sharp blade can cause serious cuts. Do not hold the blade, do not place your other hand along the cutting path of the cutter and always cut past your body. Replace blunt blades quickly and dispose of them properly. Tighten the cutter to avoid injury. Store the cutter in a safe place. Keep the cutter clean and do not expose it unnecessarily to dust, dirt and moisture to ensure longevity. No liability is accepted for consequential damage. Subject to technical changes and errors! This product should not be used by children!
